

Online Grocery Delivery System

By: Yamil Diaz

Introduction and Roadmap

- The Online Grocery Delivery System allows customers to quickly order groceries online and have them delivered at their conveniences
- The system connects customers, store managers, and delivery staff through one platform
- Customers browse items, place orders, pay online, and track their deliveries in real time.
- Store managers manage product listings and inventory, and delivery staff update delivery statuses.
- Next we will show how users can:
 - Login
 - Browse/Add to Cart
 - Checkout/Pay
 - Track Order

Live Demonstration

Login (UC1)

Email:

Password:

Login

[Login](#) [Sign Up](#) [Shop](#) [Cart](#) [Checkout](#) [Track Order](#)

Track Order (UC5)

Enter Order ID:

Track

Current Status: Out for Delivery

Plans

- Add ability for customers to add/remove items from cart
- Add ability for customers to change the quantity of an item
- Improve Checkout page to include ability for customers to input their information (name, email, etc.)
- Implement Delivery Staff and Manager dashboards
